Robin,

Just want to assure that I heard everything correctly this morning.

For the short term Menthol study (4271), MDS will be completing the tipping paper analysis. A Note to File will be completed to document the protocol change and the PA will be revised to include the costs.

For the short term Series K study (2981), Arista will be completing the filter analysis. No changes to protocol are needed. If this is true, the samples will be shipped out on 07 Jul.

Please let me know if I am on track.

Thanks
Kim
